Tools and preparation	Pass SYN reviewed kit and collection Evidence: SYN review fixture preparation · 0afe7deaca84...

Stop if site access, isolation, shutdown authority or competency cannot be confirmed. Tool-preparation exceptions do not waive these controls.

Work arrangements

SYN reviewed site controls. Visual inspection only. Stop and escalate any access, equipment identity or safety uncertainty. No intervention is authorised.

09 Completion and escalation

From work order v3 · scope v1 + template v2
as at 20 Sep 2026 · 09:46 AEST · changed since this revision

1.
 - Record observations
 - Stop before intervention

Record unresolved work and escalate to the preparation owner. This pack does not grant authority outside the approved scope. Use My Jobs to record your personal work and unresolved items. Wait for each local save to complete. Offline saves still need server acceptance; keep uncertain originals for unchanged retry. Submit the exact completion draft for factual review. Pack acknowledgement, attendance acceptance, customer response and Finance approval are separate decisions.

Escalation and remaining work

SYN reviewed completion. Visual inspection only. Stop and escalate any access, equipment identity or safety uncertainty. No intervention is authorised.
